

## Wellhead Protection Plan

It shall be the policy of the Board to take every reasonable precaution to protect the watershed area surrounding the Dayton Consolidated School wellhead from contamination or vandalism. The area extends from Rte 35 to the Hight road intersecting the wellhead approx. 500 ft behind the school.

Signage indicating the protection zone and warning motorists not to litter, dump or use fertilizer or herbicides in the area shall be posted and maintained by the SAU #7 Maintenance Department. A locking device shall be installed on the wellhead to deter vandals, and periodic inspections shall be conducted to ensure that all safeguards are in place.

All cognizant persons shall be trained to report any violations to the proper authorities. Maintenance and service personnel shall be trained to report any suspicious activity and or conditions found on site.

Adopted: 12/19/02
